ABOUT ME

Business Intelligence (BI) Analyst | Data Analyst

Detail-oriented professional transitioning from a 3+ year sales and account management career into data and business analytics. Strong foundation in Excel/Google Sheets, SQL, and Power BI, gained through a hands-on data analyst certification program. Experienced in reading commercial data, building reports, and translating numbers into decisions — now applying the same rigor to structured data analysis, dashboarding, and business intelligence work.

SKILLS

Data Analysis & Visualization

Excel/Google Sheets (pivot tables, lookups, formulas) / Data Cleaning, Data Warehousing, Data Modeling / SQL (queries, joins, aggregation) / Power BI

Reporting

Dashboard Building / KPI Tracking / Sales & Performance Reporting / Data Cleaning

Business Tools

Microsoft Office Suite / Google Workspace / CRM Platforms

Core Analytical Strengths

Problem-solving / Process Improvement / Stakeholder Communication / Attention to Detail

LANGUAGE SKILLS

Mother tongue(s): Bengali

Other language(s):

English

PROJECTS

AI-Powered Sales Analytics Dashboard - Power BI

- Built a sales dashboard with KPI cards for Total Sales, Average Sale, Highest Sale, and Total Transactions, plus breakdowns by region and category.
- Applied Anomaly Detection to flag unusual spikes in the sales trend and Key Influencers to identify drivers of sales increases.
- Used a Decomposition Tree to explore contributing factors by region and category, and Smart Narrative to auto-generate a written summary of key findings.

Movie Rental Analysis - SQL

- Wrote SQL queries joining customer, rental, inventory, and film tables from a movie rental database.
- Built a customer rental history query showing rentals, film titles, and rental dates.
- Practiced multi-table joins and relational data modeling for analytics use cases.

Employee Analytics Dashboard - Excel

- Built an HR dashboard analyzing headcount, total and average salary, and average tenure across 1,233 employees.
- Broke down workforce by gender, education level, job satisfaction, and work-life balance; visualized monthly salary trends and salary spread by tenure for Full-Time vs. Contractor staff and by working years across gender.
- Added slicers for Gender, Education, Department, Business Travel, and Employment Type for instant segment-level filtering.
